

# **Exhibit D**

**#1**  
liquid biopsy

GUARDANT360

# The most sensitive liquid biopsy available.\*

Powered by Guardant Infinity -  
the only commercially available technology that  
analyzes thousands of epigenomic signals.

Guardant360 evaluates  
**more biomarkers** with  
**higher sensitivity**  
than **TEMPUS** xF+

**200+** more genes

**2X** lower limit of  
detection for indels

**6x** lower limit of detection  
for fusions

\*When compared to other leading liquid molecular profiling companies with publicly available analytical specification information as of September 2024.  
#1 is based on internal Guardant Health data on file, Brand Tracker, 2024.  
Comparisons are based on publicly available information on tempus.com as of September 2024; 2024-02.
